Turns out [that new restaurant opening up at the Bal Harbour Shops](#) is not called Gulf Stream Restaurant, but **The Grill at Bal Harbour**. The new concept from **Hillstone Restaurant Group**, a 6,400 square foot restaurant featuring indoor and alfresco dining on the second floor, will be joining the likes of restaurants like Makoto, Carpaccio and La Goulue French Bistro as early as October 2014. Construction is slated to begin in Spring. According to a press release, The Grill at Bal Harbour will feature a unique operable window system that "can transform the entire space from a beautiful enclosed facility into an outdoor dining experience at a moment's notice." As for the menu, the restaurant will use American classics as its inspiration. Stay tuned for more details.
